The good appearance, firmly and strong environment inosulation not only meet the need of design of each kind of office staff, but also meets the ideal separation of chief manager office and meeting room, and creat an optimum platform for all your working environments.

six-person integration

High quality roller-shutter design of file cabinet utilizes the space reasonably and makes the file arrangement more convenient.

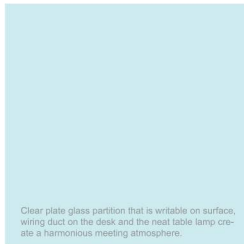

Magnetic partition makes your work easier and more convenient.

THOMAS

Office Furniture

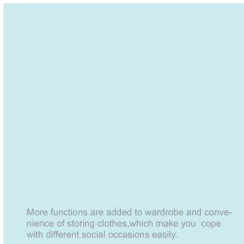

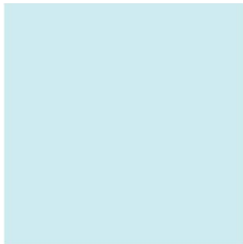

Clear plate glass partition that is writable on surface, wiring duct on the desk and the neat table lamp create a harmonious meeting atmosphere.

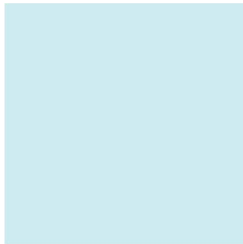

In order to adapt to the modern high-tech office work, ONEAD uses multi-function socket to meet the various demands, for example power supply line, telephone line and net wire etc.

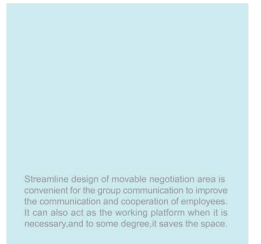

Various partition materials are freely combined and changeable, making your work more flexible to work.

More functions are added to wardrobe and convenience of storing clothes, which make you cope with different social occasions easily.

Unique A-leg design gives you a good mood.

Streamline design of movable negotiation area is convenient for the group communication to improve the communication and cooperation of employees. It can also act as the working platform when it is necessary, and to some degree, it saves the space.

The System of THOMAS

Arrangement of Cable

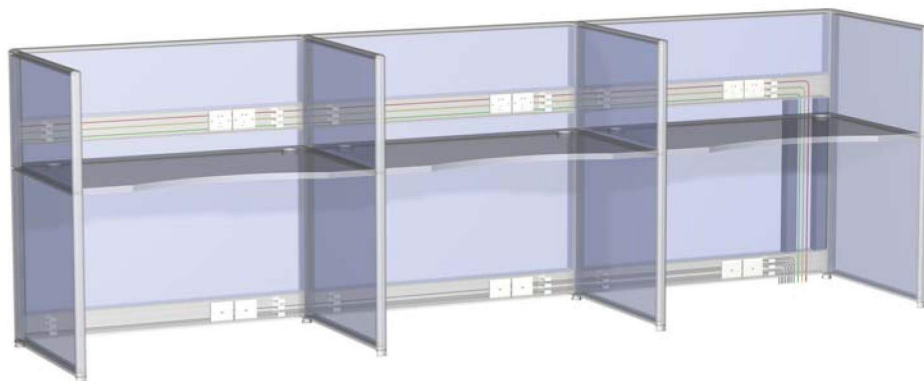

Powerful wiring system of Thomas

Thomas series adopt the standard lateral wiring and hidden vertical wiring; this enables it to realize the management of great capability line and provide appropriate and effective power distribution wiring for electronic office circumstance. This wiring is invisible but providing a large space.

Regarding the structure, power supply, internet and telephone sockets are set under the channel cover for office equipments' use; free dismantling power distribution cover, flexible and movable wiring bridge and vertical wiring joint make the inside of partition to its utmost use.

Roomy, secret and clear-level power distribution system separates the strong electricity and weak electricity,

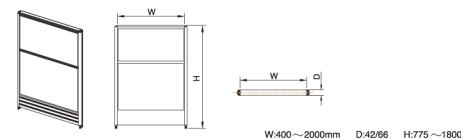

In and out lines are separated reasonably, making it easy and convenient to route and maintain.

Lateral wiring: aluminium alloy special trunking can be set up and down of the desk or under the partition. Inside the trunking there is an ABS branch joint, it is available to be separated to different use.

Vertical wiring: hidden wiring inside, which is able to be crossing route with the lateral wiring, it is easy to install. In addition, it's economic. Inside dimension of 42 Dash panels is 25mm; inside dimension of 66 Dash panels is 50mm.
